PROFESSIONAL SUMMARY

Senior Full-Stack Developer with 4+ years of experience turning product ideas and complex business needs into reliable web and mobile applications. Helped startups and growing companies launch MVPs, modernize existing platforms, improve API and database performance, and strengthen cloud delivery. Core stack includes React, Next.js, Django, Spring Boot, PostgreSQL, AWS, and Docker. Combines hands-on engineering with a product mindset, balancing delivery speed, code quality, scalability, and user needs. Based in Madagascar and available for remote work with teams in France and internationally.

TECHNICAL SKILLS

Frontend: React, Next.js, web interfaces, user experience optimization

Backend & APIs: Django, Spring Boot, Node.js, Python, REST APIs, WebSockets, authentication, authorization

Data & Performance: PostgreSQL, SQL optimization, N+1 profiling, caching, Celery, Redis

Cloud & DevOps: AWS, Elastic Beanstalk, Docker, CI/CD, deployment automation, SSL, OVH, Render

Integrations & Quality: Stripe, Sentry, testing, debugging, refactoring, technical documentation, Git

PROFESSIONAL EXPERIENCE

Senior Full-Stack Developer | Aligneurs Français

France (Remote) | Feb 2026 - Jul 2026

- Worked across frontend and backend to deliver new features for an orthodontic treatment management platform supporting aligner-based care.
- Made day-to-day platform use smoother by improving internal workflows, interfaces, and existing functionality.
- Partnered with product, business, and engineering teams to evolve APIs, solve defects, refactor code, and improve long-term maintainability.

Full-Stack Developer | Ukatis Consulting

Switzerland (Remote) | May 2025 - May 2026

- Helped build a retirement-scenario prediction application, delivering new features and establishing its backend foundations.
- Set up AWS infrastructure with Elastic Beanstalk and automated testing and deployments through a CI/CD pipeline.
- Wrote practical deployment and operations documentation to make releases more reliable and the application easier to maintain.

Full-Stack Developer - Freelance Projects | Freelancer.com

International (Remote) | Jan 2025 - Nov 2025

- Delivered focused international assignments, including a secure Spring Boot password-change module using Passay validation and encryption.
- Modernized Python dependencies for a data science project and resolved the resulting breaking changes.
- Tracked down PostgreSQL connectivity issues in a Node.js application on Render, then built authentication and authorization features.

Backend Developer | Vertex

United Kingdom (Remote) | Nov 2024 - Mar 2025

- Built REST APIs for dashboards, employee management, pricing, administration, and support on a B2B wellbeing platform.
- Added Stripe billing for fixed-price and usage-based plans, plus real-time chat with WebSockets and an XP/gamification system.
- Removed backend bottlenecks by fixing N+1 queries, optimizing SQL, and tuning asynchronous workloads with Celery and Redis.
- Made production more reliable through targeted bug fixes, Sentry monitoring, OVH domain configuration, and close collaboration with the frontend team.

Full-Stack Developer | Numer

Antananarivo, Madagascar | Jun 2024 - Dec 2024

- Took an ERP and school management platform from development through production deployment.
- Built the core backend, authentication and authorization, and business modules covering people, events, projects, equipment movements, and financial tracking.
- Added Excel import/export and internal document-management features to simplify everyday operations.

DevOps & Full-Stack Developer | Numer

Madagascar | Mar 2023 - Jun 2024

- Reduced an analytics page load time from 4 minutes to 500-800 milliseconds using custom caching, SQL optimization, and N+1 profiling.
- Developed, deployed, and maintained an existing Django full-stack codebase while helping new colleagues get productive on the project.
- Kept the platform reliable by fixing application and deployment issues, automating SSL certificate renewal, and delivering new user interfaces.

Mobile Application Developer | Numer

Madagascar | Aug 2022 - Mar 2023

- Built core iOS and Android journeys for a French fintech application, including onboarding, authentication, transactions, invoices, and payments.
- Fixed critical issues, introduced application-wide error handling, and enabled users to send invoices by email.

EDUCATION

Bachelor's Degree in Computer Software Engineering

Haute Ecole d'Informatique (HEI) | Nov 2021 - Jul 2025

LANGUAGES

French: Full professional proficiency | **English:** Professional working proficiency
